## Selected Cataloging Tools on the Internet

**Magda El-Sherbini**

**ABSTRACT.** This bibliography contains selected cataloging tools on the Internet. It is divided into seven sections as follows: authority management and subject headings tools; cataloging tools by type of materials; dictionaries, encyclopedias, and place names; listservs and workshops; software and vendors; technical service professional organizations; and journals and newsletters. Resources are arranged in alphabetical order under each topic. Selected cataloging tools are annotated. There is some overlap since a given web site can cover many tools.

### INTRODUCTION

*Selected Cataloging Tools on the Internet* refers to a vast collection of cataloging tools used by catalogers to perform their work. Until recently these tools existed only in print. With the advent of the Internet, many of these tools became easily accessible in electronic formats on the Web.

Although these tools do not replace their print counterparts, they offer the convenience of being available at the cataloger's workstation and at their fingertips. They are also more current than some of the print resources and thus help avoid some inconsistencies in applying the rules. Cataloging tools available on the Internet provide a quick service to catalogers. They are reliable and updated frequently.

Today's catalogers are able to apply multitasking and open many sessions on their PCs, enabling them to have free access to the documentation they need as they perform their work. It is common for catalogers to bookmark their favorite sources and tools they use. Such a simple concept led to the creation of this extensive, annotated bibliography.

*Selected Cataloging Tools on the Internet* is an extensive compilation of web-based resources and it provides catalogers with organized access to commonly used tools on the Internet. Annotations included with each entry provide a quick thumbnail sketch for each site, enabling the cataloger to choose what is needed. Some of the annotations are longer than others and some include quotations from the web site. There is some overlapping since a given website can cover many tools.

This bibliography is divided into the following seven sections:

Authority management and subject headings tools  
Cataloging tools by type of material:

Books  
Foreign Language Materials  
Government Publications  
Internet/Electronic Resources  
Music  
Non-book  
Rare Books  
Serials  
Theses and Dissertations  
Dictionaries, encyclopedias, and place names  
Listservs and workshops  
Software and vendors  
Technical service professional organizations  
Journals and newsletters

Resources are arranged in alphabetical order under each topic.

This web site links to processing of IUB (Indiana University Bloomington Libraries) Print Materials with Accompanying Cassette (s) at the IOCM (10 Catalog Management Department), Indiana University Bloomington Libraries.

## **Foreign Language Materials**

This section provides selected tools for cataloging foreign language materials.

ALA-LC Romanization Tables  
<http://www.loc.gov/catdir/cpsd/roman.html>

This site links to the 1997 edition of the ALA-LC Romanization Tables. It contains 54 romanization and transliteration schemes for Non-Roman Scripts. The Library of Congress and the American Library Association approved these tables. These links are to PDF files that require the Adobe Acrobat Reader.

Babel Fish (AltaVista Translations)  
<http://babelfish.altavista.com/translate.dyn>

This is an AltaVista translation tool and it provides translation to documents to or from English, French, German, Italian, Portuguese, Spanish, Russian, Japanese, Korean and Chinese.

Cataloging Foreign Language Materials  
<http://filebox.vt.edu/admin/international/resdev/catalog.html>

This site contains links to aids for cataloging foreign materials. For example, it has a section on issues in cataloging Non-Western Materials: special problems with African language materials.

Chinese Character Pronunciations  
<http://www.ocrat.com/reaq/>

This site provides a transliteration tool for Chinese characters; provides the transliterated pronunciation of each Chinese character.

Foreign Languages Aids  
<http://tpot.ucsd.edu/TSU/foreign.html>

This web site provides comprehensive links to foreign language tools such as: Abbreviations in Latin Inscriptions, Alphabet Street: Transliterations and Special

Characters, Alternative Dictionaries, ARTFL Project (University of Chicago), BabelFish (translator), Cataloging Foreign Language Materials, Chinese Character Pronunciations, Japanese Library and Information Science, Spanish Subject Headings (Oakland Public Library). It provides a brief description for each resource.

Free Translation.com.

<http://www.freetranslation.com/>

This is an easy-to-use site for rapid translations from English to Spanish, French, German, Portuguese, Italian, and Norwegian.

Glossary of Bibliographic Information by Language

<http://www.mun.ca/library/cat/lang/biblang.htm>

<http://130.15.161.74/techserv/biblang.html>

These sites list bibliographic information by language.

Google's Language Tools

[http://www.google.com/language\\_tools?hl=en](http://www.google.com/language_tools?hl=en)

This site links to Google's language tools. Users can search by language, country, and translate a text or web page.

Initial Article in Foreign Languages

[http://libweb.uoregon.edu/orbis/staffhome/titles.init\\_articles.htm](http://libweb.uoregon.edu/orbis/staffhome/titles.init_articles.htm)

This Site provides information on initial articles in foreign languages. Orbis Library Consortium, Northwest Academic Library Connection, created this link and it is based on ALA Filing Rules, published by American Librarian Association, Chicago, c1980.

Issues in Cataloging Non-Western Materials: Special Problems with African Language Materials

<http://filebox.vt.edii/cidmin/international/resdev/africana.html>

This site provides links to issues in cataloging of non-Western materials. The emphasis is on problems related to African language materials. It was created by Cynthia D. Bertelsen. October 8, 1995.

Language Identifier

These sites help to identify the language of origin of foreign words.

XRCE Language Identifier
